Web-development

EXISTING SYSTEM

Problem: The E-commerce industry is highly competitive, and it is becoming increasingly difficult for businesses to stand out from the crowd. In order to be successful, e-commerce websites need to be:

1)Easy to use and navigate
2)Secure
3)Mobile-friendly
4)Offer a wide range of products and services
5)Provide excellent customer service

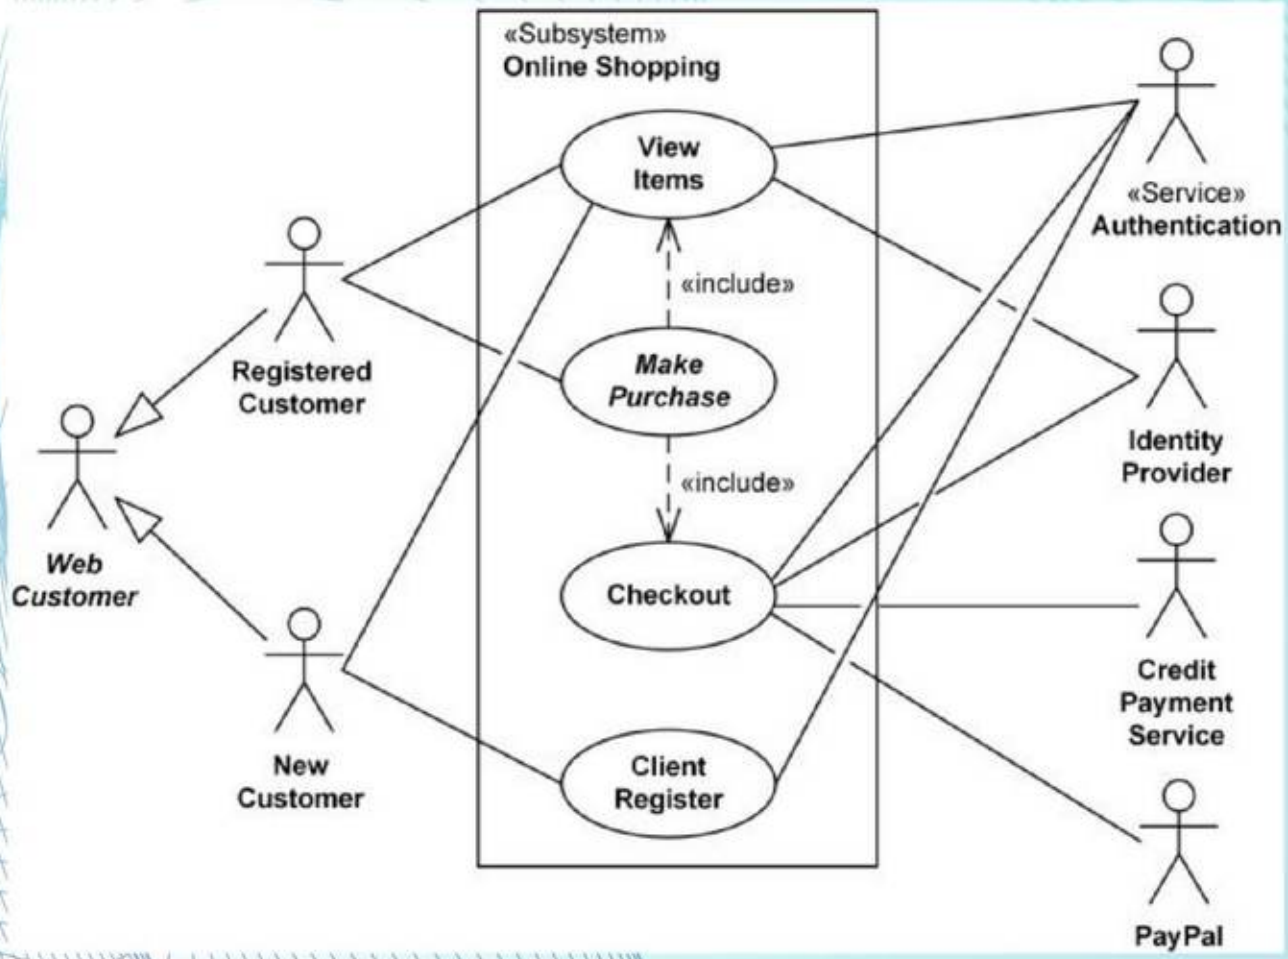

CURRENT SOLUTION

- Solution:

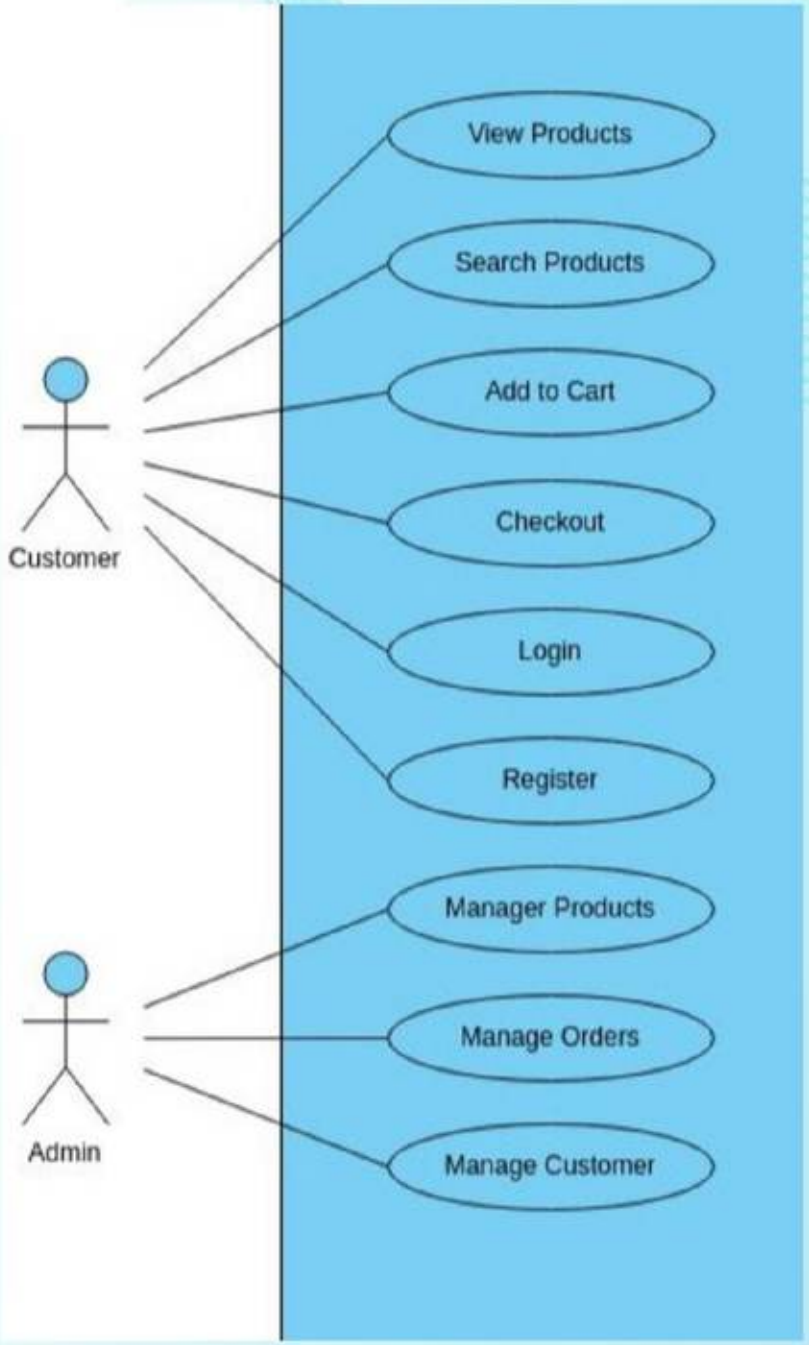

The proposed e-commerce website project will address these challenges by developing a website that is:

- User-friendly and easy to navigate
- Secure and compliant with industry standards
- Mobile-friendly and accessible on all devices
- Wide-ranging in terms of products and services offered
- Customer-centric and focused on providing excellent service

[Data Layer]

Let's move to some important features of the website

Responsive.

Our project is compatible with devices of all sizes

Interactive.

this is not a read-only website. User can interact and do many tasks.

Highly Dynamic.

Database helps in keeping the website dynamic

Also some other features like:

- User-Friendly
- Trackable
- Animations
- payment gateways
- flexible and much more!

Hardware Requirements

- PROCESSOR : DUAL CORE 2 DUO
- RAM : 2GB DD RAM
- HARD DISK : 250GB
- SPEED : 3.1 GHz
- BITS : x32 and x64

Software Requirements

- FRONT END : HTML5, CSS3 & JS
- DATABASE : PHP & MYSQL
- OPERATING SYSTEM : WINDOWS 7
- IDE : VSCODE
